

Sprint Level Testing

Sprint 1 : (Login In, Sign Up, Profile Page, Fetching Location)

- Username field was not included so due to null username initially the app crashes.
- Unique username is not implemented.
- For changing profile photo, permission for camera and gallery are not given so we cannot change profile photo.

Sprint 2 : (Individual Chat, Searching Individual)

- UI was not compatible with other devices. Position of the send button in chat changes with change in device.
- Something gibberish comes up when any other language alphabets is used instead of english alphabets.

Sprint 3 : (Create Group, Join Group, Search Group, Group Chat, Remove Member, Make Admin, Leave Group)

- Clicking on profile of any group member shows personal feature instead of that person's profile.
- The person is not redirected to the group whenever he/she enters the group.

Sprint 4 : (Rating For Group, Map Feature, Range Feature, Change and Forgot Password, Calling And Mailing Feature)

- Only marker of the anyone user is shown on map and other users and groups markers are not shown.
- Initially when no ratings are given, the rating bar shows nan instead of zero.
- The messaging OTP services are not working. The device is not getting a message.
- Calling feature is not working for individual chat.
- There is no acknowledgement given when the user changes the range.

Sprint 5 : (Create Event, Show Event)

- On opening past events tab, the app crashes.
- On uploading bigger size photos, overflow exception is created.
- Gallery is opening on pressing camera option to select the photo for event.

Final Testing :

- The time shown on the message is not correct.
- Markers are not shown on the map.
- Internet Connectivity is not checked due to which error occurs on opening change password page without internet.
- On continuously clicking on send button in chat, multiple same messages are sent.
